## STELLAR TURN IS BILLED FOR

fervescent pickaninnles that ever stepped before the footlights, Miss Regina Read will appear at the Butler theater tonight - These youngsters are on the job every minute of the act and will furnish more merriment than the proverbial box of monkeys.

Miss Reed's act is in the form of a minstrel first part. She acts as the interlocutor and the two darkskinned youngsters occupy chairs of the end men. Both of them are clever dancers and good singers. The jokes they work are all new and bright and are guaranteed to bring wrinkles of laughted to the faces of their hearers, no matter how hardened these auditors are.

Throughout the entire circuit this act has been a feature with its quaint melodies and eccentric comedy, and it is certain that the amusement-loving people of this city will take kindly to it and will give it the patronage that an act of its character deserves. They will oppear at each evening show and Sunday and Saturday matinees,

#### WONDER CAMP FORGING AHEAD VERY RAPIDLY

The following extracts from the Wonder Mining News show that things will be humming in that camp in the near future.

That the time of looking for to the beginning of actual mining and milling operations in this district is near an end, is made apparent by a visit to the Nevada Wonder mill. With the exception of putting on the galvanized iron covering to the tall section of the building which is to cover the great agitating tanks, the mill building is completed.

This covering has been left off for convenience in erecting these big steel tanks.

At the Nevada Wonder it now begins to look as though the beginning of the commencement is about ready to start. The surface machinery, with the exception of the big electric hoist and other things electrical, is practically ready for service, Unless some highly improbable accident happens which delays the completion of the power plant, the first of May should witness the starting of machinery and the sparkling of electric lights. The shaft is about rendy for business, at least down to the 200-foot level.
